

QURii

CONTROLLED ENTERPRISE INTELLIGENCE

HUMAN CONTROL AND GOVERNANCE

Move forward. Keep control.

Your judgment belongs at the center of the work.

QURii is designed to connect AI reasoning and workflow coordination with the permissions, review points and evidence your mission requires.

Make control part of the conversation.

Evaluate QURii against your own operating requirements. Agree on the data boundary, human authority and evidence needed before connecting a workflow to consequential action.

ONE WORKFLOW. A CLEAR START.

Can your team inspect how a decision was reached?

01

Define access

Confirm approved sources, user roles and what must remain outside the workflow.

02

Set approval points

Specify which actions require review and who can authorize them.

03

Inspect the evidence

Evaluate source links, decisions, exceptions and the records retained.

MAKE THE VALUE VISIBLE

Bring an operations owner and a security lead. Use a sample task to examine permissions, a rejected action and an incomplete answer. Confirm actual behavior in the proposed environment.

MEASURE THE CHANGE

Access boundaries
Approval behavior
Evidence completeness

Bring your control requirements to a technical session.
